Director of Student Support Services

July 2, 2021

Dear Parents/Guardians/Faculty/Staff:

Below is an update on four important topics:

- During the summer months the following public health measures will remain in place for all those on our school campus:
 - Students must wear masks while inside school buildings or on school buses.
 - School employees working directly with students must wear masks while inside school buildings or on school buses.
 - Masks are optional for vaccinated adults when inside school buildings, if they are not working directly with students.
 - Masks are required for unvaccinated adults when inside school buildings or on school buses.
 - Masks are optional for those who are outside on the school campus.
- Community groups wishing to use our school facilities should follow the normal building use request process. Community groups using our school facilities must adhere to the public health measures listed above. Here is a link to our online building use form: [Building Use Form](#).
- Here is a link to a New York State Department of Health memo with important information regarding vaccines required for all students in New York State, and the COVID-19 vaccine: [Vaccine Memo](#).
- Due to ongoing maintenance and construction, some areas of our school campus will be closed to the public for short periods of time during the summer months. Below is a list of projects we will be completing on our school campus this summer.
 - Resurfacing the track around the football field.
 - Retiling eight (8) classroom bathrooms at the Elementary School.
 - Replacing windows in the Maintenance Building.
 - General maintenance and upkeep on our playgrounds.

Enjoy the weekend.

Sincerely,
Robert J. Hughes
Robert J. Hughes
Superintendent of Schools
