

On behalf of the Tully School Board, I am proud and delighted to welcome all of you to tonight's program.

This Forum, as well as many of the projects and initiatives you will hear about tonight, is happening as a result of concerns, efforts, and interests shared across the entire school community: from students and faculty to the staff, administration and the school board. It is particularly gratifying that almost thirty years after the first Earth Day, environmental concerns are once again becoming an important part of the community's consciousness and conversation, and another generation is rising to the challenge of these truly worldwide concerns, both by thinking globally and, as you will learn tonight, by acting locally.

Meaningful solutions to environmental and energy challenges will come only after a long journey. Even the longest journey however, begins humbly, with a first step.

In Tully we are very pleased to see that the journey has begun.

Jan S. Kublick
Member, Tully Board of Education

For more information on the Tully Schools visit our website at <http://tullyschools.org>
